

Elbit Systems Border Control Management System (BCMS) Inaugurated by The Israeli Police

Haifa, Israel, December 26, 2006 – Elbit Systems Ltd. (NASDAQ: ESLT) Border Control Management System for the Israeli Police named ROTEM Was inaugurated today. The innovative system interfaces with all government and security agencies in Israel, managing all entry and exit posts including: airports, sea ports and land crossings.

A national project, the border control system operates on three levels, including identification of the person, tapping all relevant national data sources and enabling the border controller various options for handling each individual case, and updating all relevant data bases.

ROTEM is designed to address the country's changing security and civilian needs, enabling a dynamic management of border control., providing an integrated border control and management system processes passengers and vehicles at the various border points.

The ROTEM system incorporates cutting edge IT and technological applications and is based on an integrated name matching engine – Soundex. The innovative architecture allows the performance of several complex actions in a relatively short response time while maintaining the strict information security measures, survivability and redundancy. The system is supported by the Elbit Systems Group's integrative and comprehensive IT systems and adheres to other highly advanced data management systems developed by the Group.
